Vendor Managed Inventory (VMI) or Client Managed Inventory (CMI)	Imperial Supplies offers Customer Managed Inventory (CMI). Imperial provides our customers the technology and tools necessary to manage and maintain your inventory insuring you have full control. Alternatively, commissioned route sales agents are trained to increase product penetration at targeted accounts in their territory. They are not trained to reduce inventories or assist customers in lowering total costs associated with the acquisition of their product lines. The removal of the influence of the route sales agent will keep purchasing control in the hands of Customer rather than the supplier. The result is the ability to maintain practical, cost effective inventory levels at each location. Imperial Supplies also offers Barcode Technology, detailed, Custom Reporting, EDI Capabilities, Customer Corporate Programs, Fully Integrated Chemical Program, and Product Recommendation and Standardization Programs.
